

4C Bales

PRODUCT DESCRIPTION

GRADE 4A

New production compressed steel sheet (less than 3mm thick) bales in works furnace sizes, free from all coated, tinned, enamelled and deleterious material (other than by joint agreement from a specified source). May include galvanised steel (although the proportion may be limited by joint agreement) tightly baled and free from loose material.

GRADE 4C

New production compressed steel sheet (less than 6mm thick) bales, in works furnace sizes, including a proportion of coated material, but excluding tin, enamel and terne coating, stamping and forging flash, bar and billet ends and other high residual material. Tightly baled and free from loose material.
